Bottles	**Column 100** VL–B100	02	**Column 60** VL–B060	03
Lotion bottles	**Forma 150** VL–L150	04	**Forma 200** VL–L200	05
Closures	**Collar 24** VL–C024	06	**Collar 24 Fine** VL–C024F	07
Pumps	**Arc 24** VL–P024	08	**Arc 24 Short** VL–P024S	09
Mist heads	**Veil 24** VL–M024	10	**Veil 24 Guard** VL–M024G	11
Cream jars	**Orbit 50** VL–J050	12	**Orbit 30** VL–J030	13

Each sheet records the study geometry, nominal dimensions and points to confirm on a physical sample. Production release requires an approved supplier drawing.

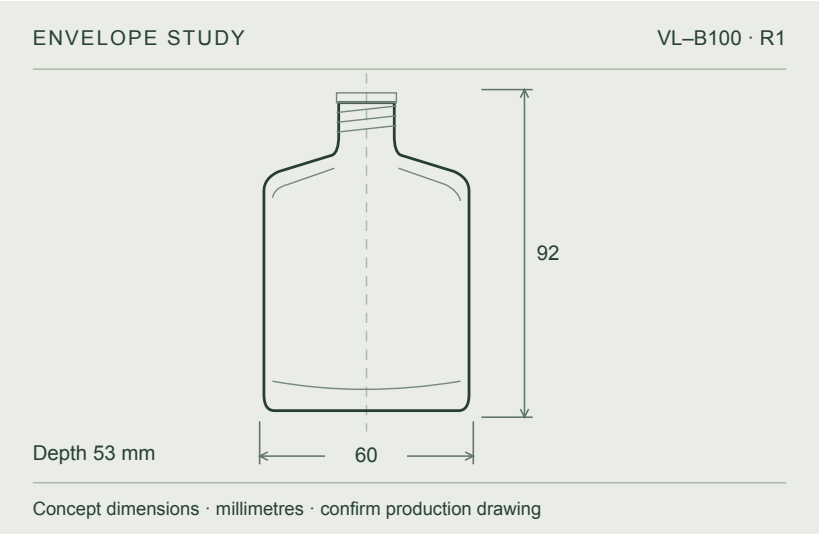
Bottles / Glass bottle

Column 100

VL–B100

A heavy glass heel anchors a straight-sided vessel. The 24/410 neck is drawn for a screw closure, lotion pump or fine-mist head.

Concept render · reference view



Nominal reference · mm

Reference specifications

Nominal fill	100 mL
Neck finish	24/410
Body material	Tinted glass
Body envelope	60 × 53 × 92 mm
Decoration area	Straight sidewall

Colour studies	Emerald · Amber · Smoke blue · Graphite
Finish options	Gloss / Satin / Matte
Pairing study	Collar 24 / Collar 24 Fine / Arc 24 / Arc 24 Short / Veil 24 / Veil 24 Guard

Confirm on physical sample

Confirm neck drawing, tooling tolerances, fill volume and mating closure before production approval.

Design reference. Production dimensions and tolerances require a supplier-approved drawing.

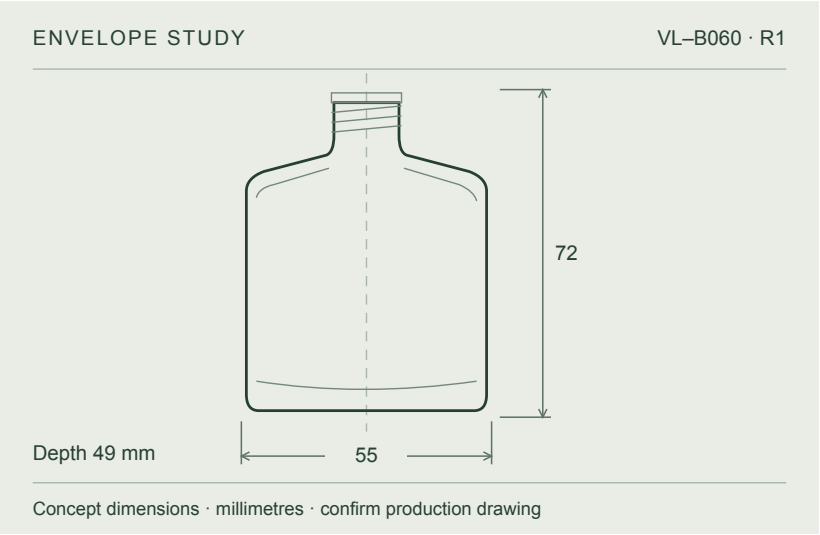
Bottles / Compact glass bottle

Column 60

VL–B060

A shorter sidewall brings the squared shoulder closer to the heel. The neck drawing uses the same 24/410 designation as Column 100.

Concept render · reference view



Nominal reference · mm

Reference specifications

Nominal fill	60 mL
Neck finish	24/410
Body material	Tinted glass
Body envelope	55 × 49 × 72 mm
Decoration area	Short front panel

Colour studies	Amber · Emerald · Smoke blue · Graphite
Finish options	Gloss / Satin / Matte
Pairing study	Collar 24 / Collar 24 Fine / Arc 24 / Arc 24 Short / Veil 24 / Veil 24 Guard

Confirm on physical sample

Confirm neck drawing, tooling tolerances, fill volume and mating closure before production approval.

Design reference. Production dimensions and tolerances require a supplier-approved drawing.

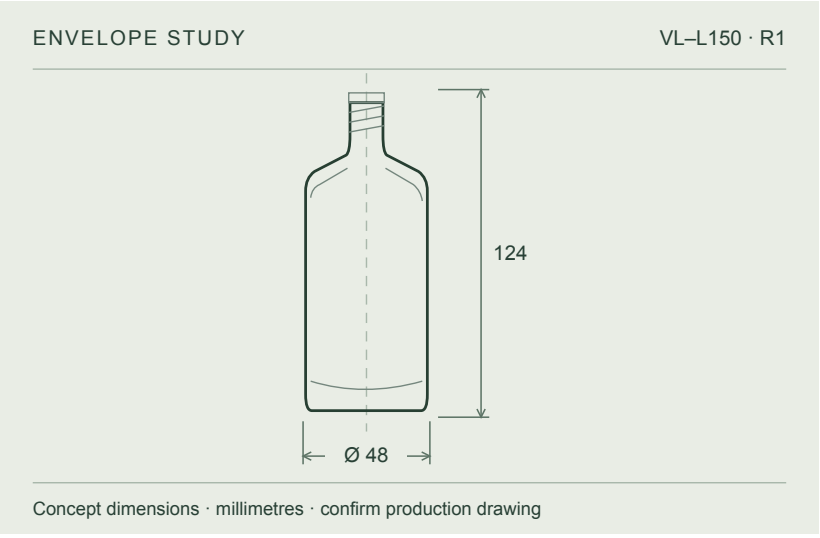
Lotion bottles / Round lotion bottle

Forma 150

VL–L150

A long cylindrical panel beneath a low shoulder frames the lotion pump. The body and dispenser can be reviewed together or specified separately.

Concept render · reference view



Nominal reference · mm

Reference specifications

Nominal fill	150 mL
Neck finish	24/410
Body material	Tinted glass
Body envelope	Ø 48 × 124 mm
Decoration area	Cylindrical sidewall

Colour studies	Smoke blue · Emerald · Amber · Graphite
Finish options	Gloss / Satin / Matte
Pairing study	Collar 24 / Collar 24 Fine / Arc 24 / Arc 24 Short / Veil 24 / Veil 24 Guard

Confirm on physical sample

Confirm neck drawing, tooling tolerances, fill volume and mating closure before production approval.

Design reference. Production dimensions and tolerances require a supplier-approved drawing.

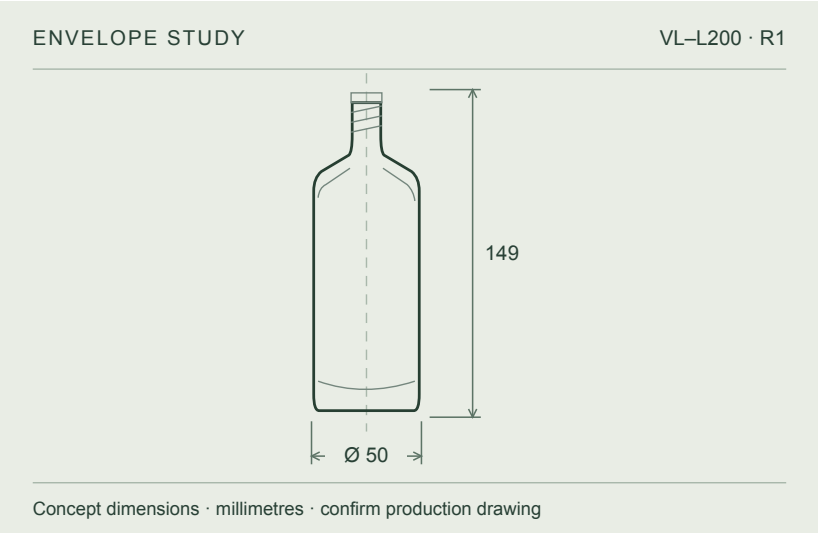
Lotion bottles / Tall lotion bottle

Forma 200

VL–L200

An extended barrel gives Forma 200 more height for a body-care presentation. The 24/410 neck retains the same proposed pump interface.

Concept render · reference view



Nominal reference · mm

Reference specifications

Nominal fill	200 mL
Neck finish	24/410
Body material	Tinted glass
Body envelope	Ø 50 × 149 mm
Decoration area	Tall cylindrical sidewall

Colour studies	Emerald · Amber · Smoke blue · Graphite
Finish options	Gloss / Satin / Matte
Pairing study	Collar 24 / Collar 24 Fine / Arc 24 / Arc 24 Short / Veil 24 / Veil 24 Guard

Confirm on physical sample

Confirm neck drawing, tooling tolerances, fill volume and mating closure before production approval.

Design reference. Production dimensions and tolerances require a supplier-approved drawing.

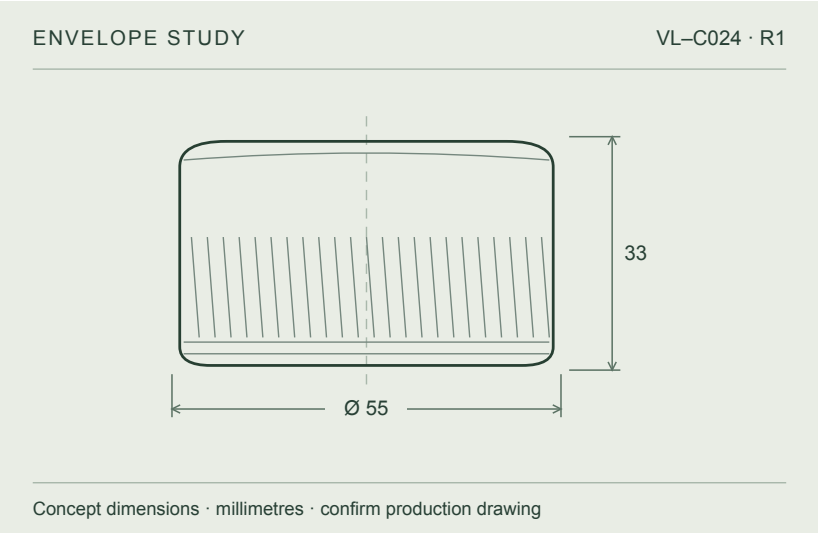
Closures / Screw closure

Collar 24

VL–C024

A close-ribbed shell turns over a threaded insert. The bright rim makes the closing line visible from across the bench.

Concept render · reference view



Nominal reference · mm

Reference specifications

Application	Closed-top seal
Neck finish	24/410
Construction	Metal shell · PP insert
Outer envelope	Ø 55 × 33 mm
Sealing surface	Replaceable liner
Grip	Broad twisted ribs

Colour studies	Silver · Copper · Pearl · Emerald · Graphite
Finish options	Satin / Polished / Matte
Pairing study	Column 100 / Column 60 / Forma 150 / Forma 200

Confirm on physical sample

Confirm the liner material, seating torque, removal torque and leakage on the intended vessel.

Design reference. Production dimensions and tolerances require a supplier-approved drawing.

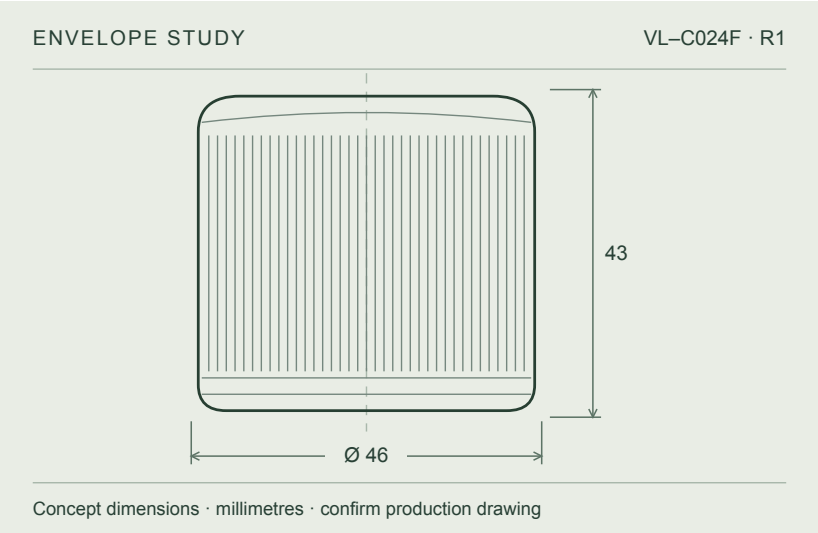
Closures / Fine-rib screw closure

Collar 24 Fine

VL–C024F

A taller sleeve carries a finer vertical grip. Compare its narrow profile and turning surface against Collar 24.

Concept render · reference view



Nominal reference · mm

Reference specifications

Application	Closed-top seal
Neck finish	24/410
Construction	Metal shell · PP insert
Outer envelope	Ø 46 × 43 mm
Grip	Fine vertical ribs
Sealing surface	Replaceable liner

Colour studies	Copper · Silver · Pearl · Emerald · Graphite
Finish options	Satin / Polished / Matte
Pairing study	Column 100 / Column 60 / Forma 150 / Forma 200

Confirm on physical sample

Confirm the liner material, seating torque, removal torque and leakage on the intended vessel.

Design reference. Production dimensions and tolerances require a supplier-approved drawing.

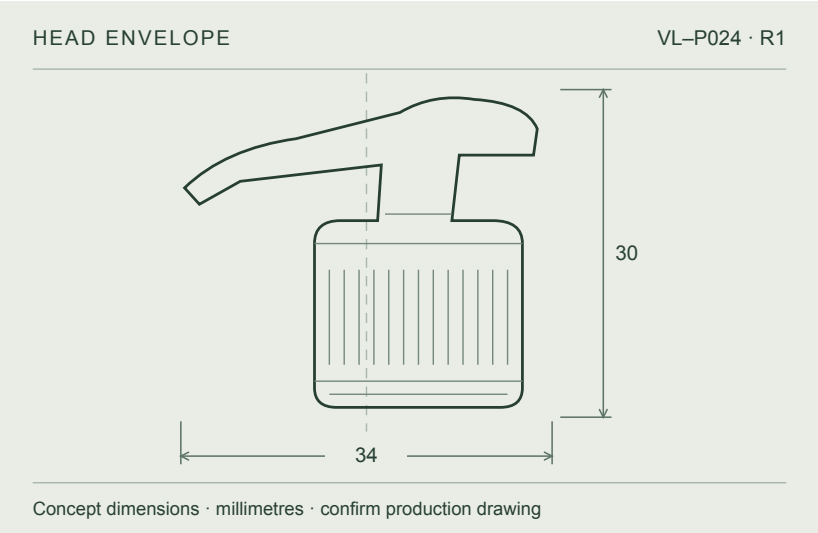
Pumps / Lotion pump

Arc 24

VL–P024

A low, swept actuator extends over a turned collar. Press the head to follow its short, spring-loaded stroke.

Concept render · reference view



Nominal reference · mm

Reference specifications

Application	Lotions and emulsions
Neck finish	24/410
Construction	PP engine · metal overshell
Head envelope	34 × 30 mm
Dip tube	Cut to vessel depth
Actuator	Standard reach

Colour studies	Silver · Graphite · Emerald · Porcelain
Finish options	Satin / Polished / Matte
Pairing study	Column 100 / Column 60 / Forma 150 / Forma 200

Confirm on physical sample

Confirm dose, lock type, priming and dip-tube length with the intended fill.

Design reference. Production dimensions and tolerances require a supplier-approved drawing.

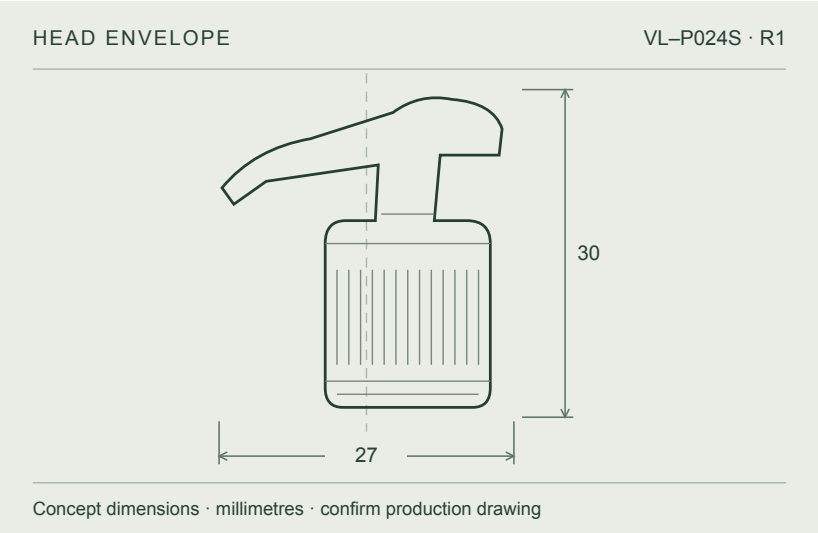
Pumps / Short-reach lotion pump

Arc 24 Short

VL–P024S

A compact actuator keeps the outlet close to the collar. Compare its lateral reach against the standard Arc head.

Concept render · reference view



Nominal reference · mm

Reference specifications

Application	Lotions and emulsions
Neck finish	24/410
Construction	PP engine · metal overshell
Head envelope	27 × 30 mm
Actuator	Short reach
Dip tube	Cut to vessel depth

Colour studies	● Graphite ● Silver ● Emerald ● Porcelain
Finish options	Satin / Polished / Matte
Pairing study	Column 100 / Column 60 / Forma 150 / Forma 200

Confirm on physical sample

Confirm dose, lock type, priming and dip-tube length with the intended fill.

Design reference. Production dimensions and tolerances require a supplier-approved drawing.

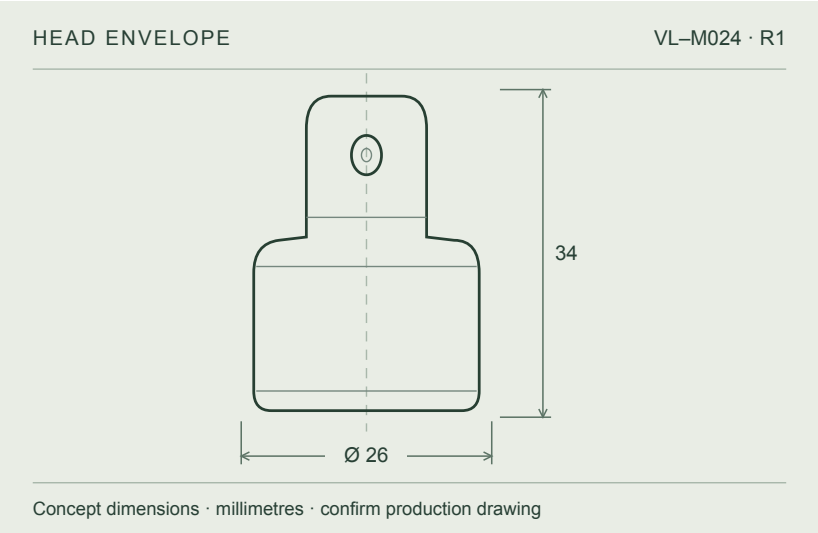
Mist heads / Fine-mist head

Veil 24

VL–M024

A compact atomiser rises from a silver-sleeved collar. A recessed nozzle locates the spray face at the front of the actuator.

Concept render · reference view



Nominal reference · mm

Reference specifications

Application	Fine-mist spray
Neck finish	24/410
Construction	Metallised PP actuator · aluminium ferrule
Head envelope	Ø 26 × 34 mm
Dip tube	Cut to vessel depth
Protection	Exposed actuator

Colour studies	Mineral · Graphite · Emerald · Smoke blue
Finish options	Satin / Gloss / Matte
Pairing study	Column 100 / Column 60 / Forma 150 / Forma 200

Confirm on physical sample

Confirm spray output, pattern and compatibility with the intended formula.

Design reference. Production dimensions and tolerances require a supplier-approved drawing.

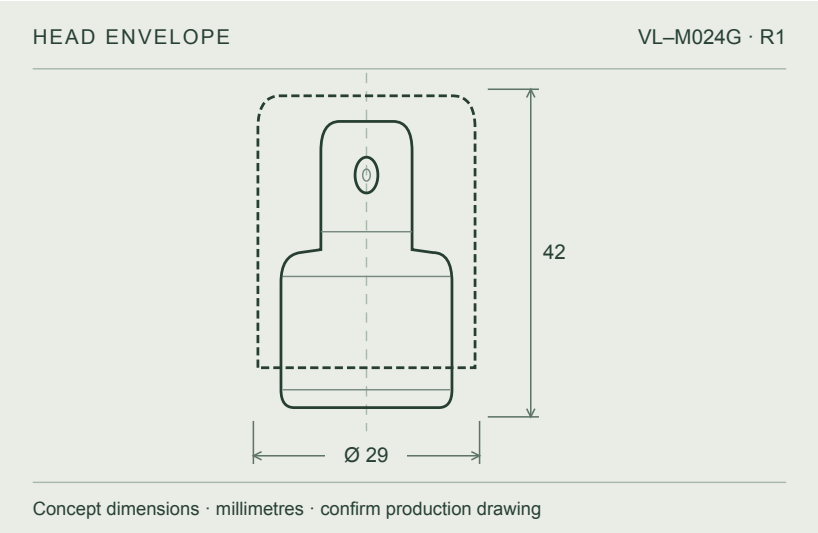
Mist heads / Overcapped mist head

Veil 24 Guard

VL–M024G

A clear protective hood rises above the actuator. Lift it to compare the covered and uncovered profile.

Concept render · reference view



Nominal reference · mm

Reference specifications

Application	Fine-mist spray
Neck finish	24/410
Construction	Metallised PP actuator · aluminium ferrule
Head envelope	Ø 29 × 42 mm
Protection	Removable clear hood
Dip tube	Cut to vessel depth

Colour studies	● Graphite ○ Mineral ● Emerald ○ Smoke blue
Finish options	Satin / Gloss / Matte
Pairing study	Column 100 / Column 60 / Forma 150 / Forma 200

Confirm on physical sample

Confirm spray output, pattern, cap retention and compatibility with the intended formula.

Design reference. Production dimensions and tolerances require a supplier-approved drawing.

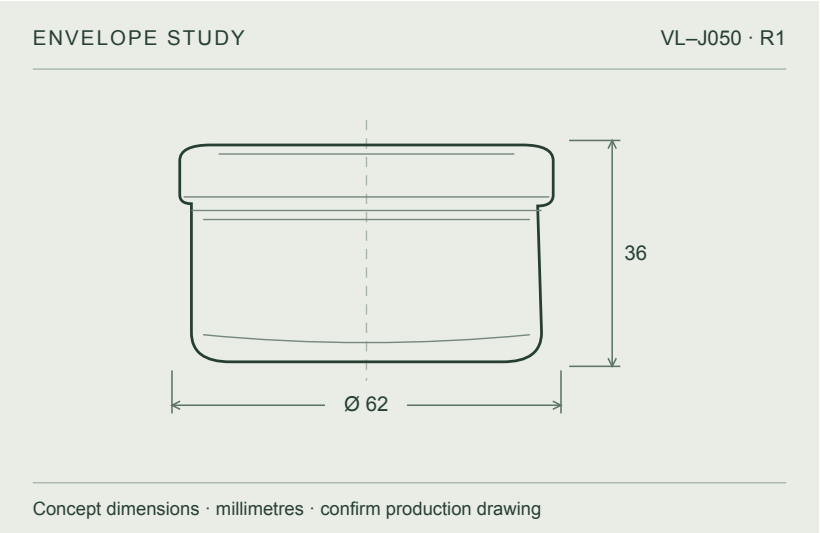
Cream jars / Wide-mouth jar

Orbit 50

VL–J050

A low glass body rests beneath a broad threaded lid. The generous opening leaves the rim and sealing plane in full view.

Concept render · reference view



Nominal reference · mm

Reference specifications

Nominal fill	50 mL
Opening	Ø 47 mm
Body material	Opaline glass
Body envelope	Ø 62 × 36 mm
Closure	Matched screw lid

Colour studies	Celadon · Emerald · Porcelain · Graphite
Finish options	Gloss / Satin / Matte
Pairing study	Matched jar lid and liner

Confirm on physical sample

Confirm the paired lid, liner contact, fill volume, leakage and decoration clearance.

Design reference. Production dimensions and tolerances require a supplier-approved drawing.

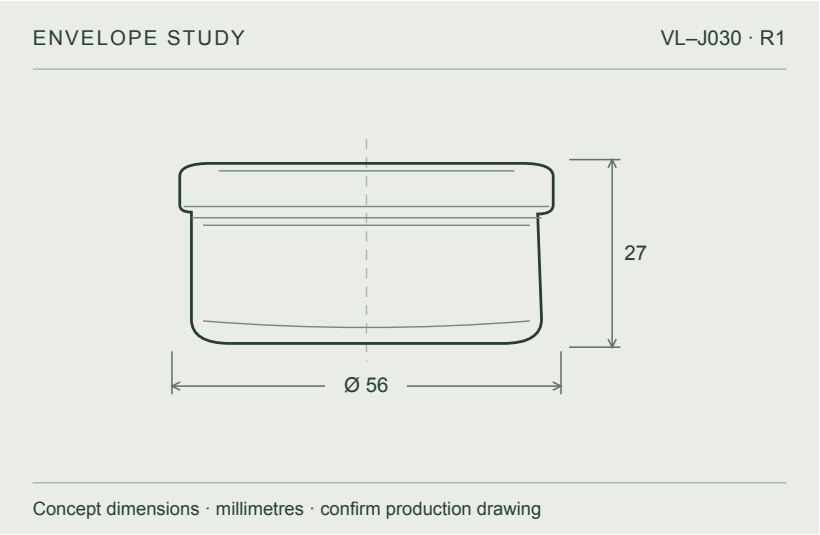
Cream jars / Low-profile cream jar

Orbit 30

VL–J030

A lower body and matching lid keep the cream jar close to the counter. Its dedicated rim is drawn separately from the bottle neck system.

Concept render · reference view



Nominal reference · mm

Reference specifications

Nominal fill	30 mL
Opening	Ø 43 mm
Body material	Opaline glass
Body envelope	Ø 56 × 27 mm
Closure	Matched screw lid

Colour studies	Porcelain · Celadon · Emerald · Graphite
Finish options	Gloss / Satin / Matte
Pairing study	Matched jar lid and liner

Confirm on physical sample

Confirm the paired lid, liner contact, fill volume, leakage and decoration clearance.

Design reference. Production dimensions and tolerances require a supplier-approved drawing.
